Partnering with Today's Entrepreneurs to Create Successful Technology Companies of Tomorrow

Acquired by EMC Corporation

Network Intelligence was acquired by EMC Corporation for approximately \$175 million in September. This acquisition was the result of a close partnership that developed over the past two years. During this time it became clear that Network Intelligence's vision for "all the data" was tightly aligned with EMC's vision of information-centric security. Congratulations to everyone involved for applying all the resources required to transition from a promising start-up to a world-class security company. www.network-intelligence.com
