Partnering with Today's Entrepreneurs to Create Successful Technology Companies of Tomorrow

## Powerful New Product

SOFTTRAX announced Softrax Revenue Manager™ providing an entirely new way to manage revenue recognition. It is the only enterprise software application dedicated to managing revenue recognition processes in concert with existing enterprise systems. With Softrax Revenue Manager, global companies can lower compliance risk; standardize revenue recognition accounting; bring revenue into the normal close process; and gain unprecedented insight into future revenue streams. ## Names Executive Vice President of Sales

Matt Durkin has been appointed Pyxis Mobile's Executive Vice President of Sales, and will be responsible for all sales functions. "I am eager to use my experience in growing annual sales to help move Pyxis Mobile into the next phase of its development," Mr. Durkin said. "Pyxis Mobile has built a strong reputation and product suite using its financial services industry expertise, commitment to building applications for the modern mobile professional and strong technical vision." ## Introduces the IPS 5500 E-Series

Top Layer Networks, a global leader for high performance intrusion prevention solutions, announced the latest version of its flagship IPS 5500 intrusion prevention solution – the E-Series. In addition, Top Layer's new IPS Controller management software provides real-time "Command and Control" functionality to configure and manage multiple IPS 5500 units throughout the network. For more information on the E-Series, please visit [www.toplayer.com](http://www.toplayer.com).

## Remote Video Analytics

IntelliVid, a leading provider of intelligent video applications for retail loss prevention and store intelligence, today announced Remote Access Collaboration™, a new software feature available within its Video Investigator offering that turbo charges retailers' remote management capabilities with access to smart video analytics anywhere, anytime. The network-based approach allows managers to share critical store intelligence from a remote desktop or laptop via a web-based browser. [www.intellivid.com](http://www.intellivid.com)
