Partnering with Today's Entrepreneurs to Create Successful Technology Companies of Tomorrow

## Bug Battle

uTest recently announced the results of its inaugural Bug Battle competition. The software testing company launched the contest to ask its community of 12,000+ professional testers to evaluate the latest versions of the three leading web browsers. Our testers discovered nearly 700 bugs, and the results were covered in *PC World*, *Information Week*, *Dr. Dobbs' Journal*, and the *Washington Post*. Competition details can be found at [www.utest.com/bug\\_battle](http://www.utest.com/bug_battle). Company information is available at [www.utest.com](http://www.utest.com).

## Softrax Revenue Manager 2.0 Released

Softrax released a new version of its revenue recognition software. Softrax Revenue Manager works in concert with Oracle, SAP, and Microsoft enterprise systems to automate the entire revenue lifecycle. The new version adds many new features and enhancements that improve productivity, executive insight, and business performance. As a result, customers are able to lower their compliance risk; achieve more accurate and consistent revenue recognition; and optimize overall revenue performance. ## City of Baltimore Signs On

The City of Baltimore is the largest municipal subscriber to date of Envista's map-based, Software as a Service product that allows municipalities, utilities, and government agencies to share and coordinate infrastructure construction and maintenance project schedules online. Baltimore will use the application to coordinate work among city departments and its gas utility, Baltimore Gas Electric, to save on construction costs, reduce street cuts and repaving, and leverage the use of taxpayer dollars. ## BMC Partnership Announced

Apparent Networks continues to bring its next-generation 'path-centric' approach to network performance management to major IT outsourcers, managed service providers and large enterprises. The path view lets customers see their infrastructures from the perspective of their critical business services, freeing IT teams to cut costs and do more with less. Most recently, Apparent completed a partnership with BMC to bring its unique network management capabilities to BMC's industry-leading service desk solution.
