Partnering with Today's Entrepreneurs to Create Successful Technology Companies of Tomorrow

### Now Offering Health and Welfare Consulting

Highroads, the Company providing employers complete control over their healthcare costs and compliance, announces HighRoads Consulting for health and welfare programs. This new consulting service, under the direction of health and welfare leader [Josh Miley](#), is a refreshing alternative for industry advice that--for the first time--puts employers in control at one-third the cost of using a traditional HR benefits consultant. For more information, go to [www.HighRoadsConsulting.com](http://www.HighRoadsConsulting.com) [www.highroads.com](http://www.highroads.com)

### Pyxis Featured in Windows Mobile Marketplace

Pyxis Mobile, the leading provider of wireless applications that drive value for corporations and their customers, is featured in Microsoft's newly announced Windows Mobile Marketplace. Pyxis Mobile will have applications featured in the Windows Marketplace Business Center, making it easier for business users to locate and purchase the latest mobile business tools. See more at [www.pyxismobile.com](http://www.pyxismobile.com).

### uTest Makes AlwaysOn Global 250

On July 16, uTest was named to the prestigious AlwaysOn Global 250 list. In fact, uTest was named one of only eight category winners, claiming the top spot in the SaaS & Enterprise category over 40 other finalists. uTest was chosen based on growth, market opportunity, quality of innovation and customer traction. The Global 250 list was selected from more than 1,000 other technology companies nominated by investors, journalists and tech industry insiders. Previous winners include Google, Twitter and Salesforce.com. [www.utest.com](http://www.utest.com)

### Fujitsu Partners with Nexaweb

Nexaweb Technologies has signed a strategic partnership with Fujitsu System Solutions Ltd (Fsol) to deliver state-of-the-art enterprise application solutions and system modernization offerings to the Japanese and Asian-pacific marketplace. Together, Fujitsu Systems Solutions and Nexaweb are delivering technology solutions that move business applications and portfolios to the Web - helping to reduce software license and support expenses by more than 50%, decreasing hardware and local resources dependencies, and eliminating reliance on application delivery solutions. Fujitsu Systems Solutions partnership with Nexaweb enables the firm to offer solutions to their customers built using Nexaweb's enterprise application modernization and delivery platform, the Nexaweb Enterprise Web Suite (EWS). ### New Headsets an Excellent Value for Contact Centers

VXI Corporation announced two new offerings for the contact center and office markets. With VXI's focus on superior audio quality and all-day wearing comfort, the Passport® 21 and the VXI Tria™ headsets are positioned to provide excellent value in today's challenging economic climate. Both headsets feature a noise-canceling microphone that filters out unwanted background noise, providing a more rewarding customer experience. [www.vxicorp.com](http://www.vxicorp.com)

### Allegheny County Selects Envista for Coordination with Columbia Gas

Western Pennsylvania's Allegheny County has chosen Envista for its utility coordination initiative to provide a single, web-based reference for projects planned in the public right of way. Columbia Gas of Pennsylvania is the first major utility serving the area - including Pittsburgh - that will coordinate with Allegheny County using Envista technology. Envista is a map-based, Software as a Service that allows utilities, municipalities, and government agencies to coordinate infrastructure construction and maintenance project schedules online. ### Survey Shows Network Issues Stalling New App Deployments

Apparent Networks recently surveyed hundreds of network managers to learn about the key challenges they face today. More than 36% of respondents said they delayed deployments of new applications such as VoIP and unified communications due to network performance concerns. Of those, 61% said issues outside their own networks present the biggest roadblocks to these deployments. Apparent's AppCritical and PathView products directly address the challenge of managing network performance across distributed environments. For more information on the survey go to [www.apparentnetworks.com](http://www.apparentnetworks.com)

### Enhancing Mobile Usage of Leading Social Networking Brands

OnePIN is extending its CallerXchange mobile social address book service to include one-click friending to social networks after phone calls to new friends. OnePIN is currently engaged with Twitter and other leading internet brands for a beta release of this new service. As mobile operators are seeing double digit increases in data usage from mobile phone users that use social networking, OnePIN offers an unmatched ability to virally increase the growth of these services across all handsets available in the market.
