

Launches Breakthrough Solution for Infrastructure

Envista unveiled its Software as a Service for map-based synchronization of construction and maintenance projects among utilities, municipalities and highway/transportation agencies. Envista automatically geo-locates projects and identifies potential data or location conflicts. All that is required is internet access and a browser. With concerns about infrastructure at an all-time high, Envista provides the first technology solution for better planning, more efficient operations and reduced paving costs. Check out their three-minute demo at www.envista.com

Next Generation Bluetooth Headset

VXI received pre-orders for over 2,200 units of the new BlueParrott B250 Bluetooth headset for noisy environments. The BlueParrott B250 is an enhanced version of the already successful BlueParrott B150 wireless headset. The B250 unit provides longer talk times and easier functionality for the end-user. The BlueParrott family of headsets are sold into noisy environments including long-range and fleet trucking, construction and emergency services, as well as to recreational RV and limousine drivers. www.blueparrott.com www.vxicorp.com

Expands Worldwide Sales Team

Neil brings over twenty years of sales and marketing management experience in the wireless and high technology space with start-up and Fortune 100 companies, both domestic and international. In addition, OnePIN continues to expand its global presence by opening offices in Paris, France and Istanbul, Turkey to service the European, Middle East and African regions. www.onepin.com

Wins at Mobile Entertainment Forum

Zeemote was twice honored at the Mobile Entertainment Forum's (MEF) fifth annual Meffy awards in Cannes, France. The JS1 controller won the first ever "Quality of Experience" award, chosen by a broad panel of consumers, for bringing a near console gaming experience to mobile games. Through its ease-of-use, ergonomic design and simple set up via Bluetooth, the JS1 provides user-friendly, intuitive and engaging game play for consumers. Zeemote also took the "Technology Innovation" award, demonstrating that the JS1 controller directly enhances the uptake and enjoyment of mobile gaming by removing the limitations associated with a directional keypad. www.zeemote.com
