

UPDATE

Partnering with Today's Entrepreneurs to Create Successful Technology Companies of Tomorrow

Announces Launch of Revenue Manager

Softrax Revenue Manager mirrors a company's revenue policy in a single system and controls all critical revenue processes within existing ERP environments. By consolidating revenue recognition activities, the product provides a series of critical benefits, including lower compliance risk, more accurate and consistent revenue recognition, faster and more flexible revenue reporting and unprecedented insight into future revenue streams. www.softrax.com

Experiences Record Growth in 2007

In 2007, IntelliVid grew its installed base of video intelligence software solutions by 50%. These new installations included work with several of the Retail Top 50 in both the department and specialty store verticals. Growth rates are expected to accelerate in 2008, with confirmed Q1 2008 installations increasing IntelliVid's installed base by a further 75%. This strong growth is driven by the addition of Store Intelligence applications to IntelliVid's already industry-leading loss prevention solution. www.intellivid.com

Revolutionizing Consumer Data

Genalytics rolled out the Premium Affluence Measurement Suite of data for every household in the country in Q1. These data elements that have been tested and verified as more accurate than other data sources are currently under evaluation for licensing by two of the three major data compilers. The elements include: Premium Estimated Income, Home Value Estimate, Discretionary Income, Invested Assets and Premium Net Worth. Specific financial propensity scores for financial instruments: Equities Market, IRA, 401K, Keough, Mutual Fund and Bonds are also available as nationwide selects. www.genalytics.com

Tremendous Interest in Modernization Solutions

Leveraging their market-leading enterprise web development platform along with automated code-generation tools, Nexaweb can now modernize enterprise legacy applications with lower risk, lower cost and unprecedented speed. Nexaweb Advance, by automating the reuse of existing application code, allows enterprises to transform legacy business applications from 3GL/4GL technologies to rich, composite web applications. Nexaweb Advance pairs Enterprise Suite and Professional Services with "translation" automation for existing PowerBuilder, ColdFusion, C++, VisualBasic and Oracle Forms applications. Nexaweb is seeing tremendous interest in this solution from commercial and public sector organizations globally.
